WHAT MAKES UEA SO SPECIAL?

The University of East Anglia is a publicly funded major UK research and teaching university. It was built to embody a radical new vision for higher education, where interdisciplinarity is crucial and excellence in both research and teaching is valued. UEA consistently ranks within the top quarter of universities in the UK for the quality of research and teaching.

As a major regional employer and cultural centre, we take our regional civic responsibilities very seriously and have kept our sights on the people and place we call home. In fact, we launched our University Civic Charter in October 2023; created from in-depth community engagement, renewing our commitment to the region as part of our 60th anniversary.

There are many things which make UEA special, not least of which is the community of staff and students that work and study here. UEA includes three Nobel prize winners, including Sir Paul Nurse and Sir Michael Houghton, and many fellows of the Royal Society and British Academy amongst our alumni and current staff.

Our campus is home to Sir Denys Lasdun's iconic brutalist architecture set in hundreds of acres of beautiful country park that includes a large broad (lake). In the spirit of Lasdun's ambition to inspire an anatomy of ideas, today, UEA is tackling some of the key challenges of the changing world. UEA's research combines disciplines

and breaks new boundaries across its priority research themes of climate, creative and health.

UEA is the place where global warming was first documented. Since the 1970s, UEA's Climatic Research Unit, and more recently Tyndall Centre for Climate Change (Headquarters hosted at UEA), have played a pivotal role in developing temperature records and climate models, contributing to the understanding of climate change, and informing global policy. Many UEA scientists have played significant roles in the Intergovernmental Panel for Climate Change (IPCC), which was jointly awarded the 2007 Nobel Peace Prize for its efforts to increase public knowledge of anthropogenic climate change. Environmental Science and Global Studies at UEA continue to be a major powerhouse for research and teaching.

UEA is widely regarded as a pioneer in creative writing, having established the UK's first Creative Writing Masters programme in 1970. This renowned programme has since attracted and produced numerous successful writers, including Booker Prize winners such as Ian McEwan and Anne Enright, and Nobel Prize Winner Sir Kazuo Ishiguro. In recent years, UEA academics have played a pivotal role in the discovery and presentation of the Gloucester Royal shipwreck (Norfolk's Mary Rose). Our iconic Sainsbury Centre for Visual Arts is a major museum and arts research facility.

Health research at UEA not only embraces the Faculty of Medicine and Health but draws in research from both social and natural sciences. Research under this theme has made major contributions in the fields of healthy ageing, epidemiology and involving citizens (via our innovative Citizens' Academy) in improving health care outcomes. This theme benefits from close association with the other major research institutes on the Norwich Research Park; notably the Norfolk and Norwich University Hospital and the Quadram Institute. The Norwich Cancer Research Network, and Norfolk Institute for Healthy Ageing, are examples of key mechanisms for delivery of real impact from health research at UEA.

UEA has been a major success over the last 60 years and looks forward with confidence to the next 60 years.

For an informal discussion about the post please contact either Professor Ian Renfrew, Head of the School of Environmental Sciences (i.renfrew@uea.ac.uk), or Professor Tim Osborn, Director of the Climatic Research Unit (t.osborn@uea.ac.uk).

UEA is part of the Norwich Research Park

Norwich Research Park (NRP) membership locates UEA in one of the largest concentrations of research institutes in the whole of Europe – four independent internationally-renowned research institutes: John Innes Centre, Quadram Institute, Earlham Institute and The Sainsbury Laboratory; with the University of East Anglia and Norfolk and Norwich University Hospitals NHS Foundation Trust, supported and funded by The John Innes Foundation, The Gatsby Foundation, and UKRI Biotechnology and Biological Sciences Research Council.

The NRP provides an ideal environment for collaborative use of infrastructure and facilities, with a single portal for academics and businesses to access the specialist facilities across the Park.

The Enterprise Centre is a regional business, knowledge and innovation hub, with workspace provision and supports over 80 businesses working alongside UEA staff and students in a dynamic and vibrant entrepreneurial community. On the wider NRP, there are dedicated laboratory and office spaces in the Innovation Centre and Centrum hosting over 600 staff within a total of 115 businesses and spinouts.

THE ROLE

UEA seeks an inspiring, innovative and dedicated leader to conduct world-leading research in any aspect of climate and the environment. This flexible position will allow you to conduct research, seek funding and supervise PhD students in areas that match your expertise. Your research will benefit society through better knowledge of our climate system, climate change and its impacts, supporting societal responses and policy solutions.

This post is open to applicants with exceptional track records in a broad range of relevant areas, including:

- Coastal science and coastal change
- Climate change observations, projections and impacts
- Societal understanding and responses to climate change
- Ocean, atmosphere and Earth system processes and dynamics

This is a tremendous opportunity to advance your academic career in a world-leading, vibrant and interdisciplinary environment, and to make a difference.

THE ROLE

The University of East Anglia (UEA) is pleased to announce the creation of a new chair position, made possible through philanthropic support: the *Sir Anthony Habgood Professor of Climate and the Environment*, in the School of Environmental Sciences. This indefinite professorial appointment represents a strategic investment in advancing and extending climate change research at UEA.

The successful candidate will hold a Professor (Chair) position in the School of Environmental Sciences at the University of East Anglia.

For the first five years, the successful candidate will focus on their research and its societal impact. During this period, teaching and administrative duties will be reduced to enable focus on leadership and research. This will allow the post holder to build their research group through seeking external funding and PhD studentships and to further develop internal and external collaborations.

This appointment comes at a pivotal moment for UEA as we advance the delivery of our Strategy 2030 and deepen UEA's contributions to understanding and addressing the challenges of our changing world. UEA has a distinguished track record of translating its research into real-world impacts, and the postholder will receive institutional support for doing this.

The role brings the opportunity to work closely with existing areas of research strength at UEA, such as the **Climatic Research Unit (CRU)**, the **Tyndall Centre for Climate Change Research**, the **Collaborative Centre for Sustainable Use of the Seas (CCSUS)**, and the **Centre for Ocean and Atmospheric Sciences (COAS)**. Joining one or more of these active research groups will provide an academic home, collaborative working and leadership opportunities. Multi-disciplinary research will benefit from UEA's cross-faculty research theme ClimateUEA, which facilitates links across disciplines undertaking climate change research.

THE ROLE (CONTINUED)

We are seeking an outstanding academic with a proven track record — or clear potential — for agenda-setting climate research of international calibre, evidenced by publications, grants, and other measures of esteem. This role offers an exceptional platform for the post holder to expand their research and increase their visibility within the research community, and to pursue new ideas.

The post holder will primarily undertake research related to climate change, the climate system or coastal change, according to their area of specialism. They will engage fully with the strategic development of this research across UEA, including with the Tyndall Centre, ClimateUEA, the School of Environmental Sciences and more widely the Norwich Research Park.

KEY RESPONSIBILITIES

- Lead world-class research on climate and the environment, enhancing our understanding of climate change and associated risks to inform societal responses.
- Contribute to solidifying and enhancing UEA's national and international reputation in climate and the environment, including through contributions to international activities and assessments efforts.
- Lead and contribute to national and international collaborative funding bids and deliver high-quality and innovative publications, research outputs and research impact.
- Foster interdisciplinary collaboration across UEA, including with the Tyndall Centre for Climate Change Research, CRU and partners across the Norwich Research Park.

- Contribute to teaching and to School of Environmental Science activities, and to providing a stimulating environment in support of UEA's undergraduate and postgraduate students and a collegiate atmosphere.

The post holder will be supported by UEA's professional services teams across research/innovation funding, finance, HR, IT, and more.

UEA is a UK Top 25 university with a diverse and international community of students and staff. It offers research-led teaching in a range of subjects across the Sciences, Arts and Humanities, Social Sciences, and Medicine and Health Sciences. The School of Environmental Sciences has a 50+ year history in multidisciplinary environmental science and exceptional credentials in climate research. In REF2021, over half of the School's research outputs were considered world leading (55%) and most (94%) were world leading/internationally excellent. The School is in the top 10 percent of departments in the UK for research and impact in Earth Systems and Environmental Sciences.

THE PERSON

EDUCATION, EXPERIENCE AND ACHIEVEMENTS

- Proven or clear potential for agenda-setting research in the area of climate and the environment of an internationally high standard, evidenced by grants, publications, and/or other measures of esteem. (E)
- An exceptionally strong profile with sustained quality of externally peer-reviewed research outputs. (E)
- Success in raising significant external funding for research. (E)
- Successful supervision of research students, including training and mentoring through to successful completion of their PhDs. (D)
- Track record or clear potential to develop academic and non-academic impact of research, which could include roles as an IPCC author or other prominent international or national science-policy-practice work, or engagement with stakeholders, policy, business, or third sector. (E)
- Enthusiasm and ability to teach effectively at undergraduate and postgraduate level. (E)
- Clear potential to lead a significant research group, with evidence of successful leadership and management of research

projects and research teams. (E)

- An excellent and innovative teacher, with experience of teaching and assessing undergraduate and/or taught postgraduate courses. (D)

PERSONAL ATTRIBUTES

- Empathetic leader who engages fully with staff at all levels and in a variety of disciplines. (E)
- Strong verbal and written communication skills with the ability to communicate complex information clearly. (E)
- Willingness to mentor and support others' ideas and proposals. (E)
- Excellent coordination, supervisory, mentoring and advisory skills. (E)
- Demonstrable skills in managing and prioritising a varied workload in a high paced environment. (E)
- Enthusiasm and willingness to translate research findings into insights relevant to climate policymakers and other stakeholders. (D)

Essential Requirements (E) are those, without which, a candidate would not be able to do the job.

Desirable Requirements (D) are those which would be useful for the post holder to possess and will be considered when more than one applicant meets the essential requirements.

FURTHER INFORMATION

This full-time post is available from 1 October 2026 on an indefinite basis.

Salary: Professorial scale. An attractive remuneration package is available for an outstanding candidate.

Relocation expenses are reimbursable under certain conditions.

Place of Work - The University is strongly committed to providing an excellent student experience and research environment, and it is expected that all staff will be available on campus to carry out their duties during their working week in support of these goals. We have a hybrid-working policy which supports a mix of at home and on campus 'hybrid' working for many roles. For the majority of hybrid roles, the expectation is a minimum of 60% of working time will be spent physically present in the workplace.

The flexibility of the hybrid-working policy allows the possibility of some remote working, but it is the expectation that all appointments will be UK based, with any overseas working agreed in advance by exception only.

If successful you will be asked to show evidence of right to work in the UK prior to any formal offer being made. Non-British and non-Irish nationals entering the UK to undertake employment or who are currently in the UK will have to meet eligibility criteria under the points-based immigration system. The University may be able to provide sponsorship under the Skilled Worker route if relevant criteria are met. Please note, due to the complexities of the immigration system, Skilled Worker visa sponsorship is not guaranteed for every role. If you would like further information about whether this role is eligible for visa sponsorship, please contact staff.visacompliance@uea.ac.uk

The post is superannuable under the Universities Superannuation Scheme and there is an annual leave entitlement of 30 days plus statutory (8 days) and customary (6 days) holidays. The University is committed to creating an environment where the health, welfare and safety of all students and staff is of paramount importance. The University's Safeguarding Policy addresses both child protection and safeguarding children, young people and vulnerable adults within the work of the University. Appointment will be subject to

satisfactory pre-employment checks, which may include an Occupational Health assessment.

Information on the benefits of working at UEA can be found at <https://www.uea.ac.uk/about/working-at-uea>.

If you require the information contained within this candidate brochure in a different format please email staff.recruitment@uea.ac.uk

HOW TO APPLY

To apply for this vacancy, please follow the online instructions at: <https://vacancies.uea.ac.uk>

The closing date for this role is 11:59pm on **17 May 2026**.

Please note that the application form contains an Equal Opportunities section which must be completed. The Equal Opportunities information will not be made available to the selection panel and will not form any part of either the short-listing or decision making process.

It is anticipated that interviews for shortlisted candidates are expected to take place on **29 June 2026** and we will inform you of the outcome of your application prior to this date.

Reasonable travel and incidental expenses incurred in attending the interview will be reimbursed (please ensure that you keep all receipts). Please note that if you are offered a post and decline the offer, travel and incidental expenses will not be reimbursed.

ABOUT THE SCHOOL

School of Environmental Sciences

The School of Environmental Sciences provides a vibrant environment in which to carry out environmental and allied research. The School is one of the largest and longest established academic departments in Europe to focus on the study of the global environment. Our research and teaching span the fields of marine and atmospheric sciences, climate sciences, geosciences, environmental biology, geography, social sciences and economics. In line with its strong interdisciplinary ethos, research collaborations occur within and between these subjects. In 2017, our sustained contribution to understanding and protection of the environment was recognised with the award a Queen's Anniversary Prize for Higher and Further Education.

Research and Innovation

Our research is highly acclaimed. In the 2021 Research Excellence Framework exercise, we were 4th overall for research quality in Earth Systems and Environmental Sciences, with 94% of our research judged to be either world-leading or internationally excellent in terms of originality, significance and rigour. The School encompasses the Climatic Research Unit, Tyndall Centre for Climate Change Research, the Science, Society and

Sustainability (3S) Research Group and the Centre for Social and Economic Research on the Global Environment (CSERGE).

The School has world class facilities including the Stable Isotope Laboratory, the Roland Von Glasow Air-Sea-Ice Chamber, a fleet of sea gliders, the Weybourne Atmospheric Observatory and a range of geophysical equipment. In addition, the Science Faculty Instrument Platforms provide state-of-the-art major and trace element and image analysis capabilities. Computing facilities available to the university research community include a High Performance Computing Cluster with Linux support.

Teaching

The School runs a number of MSc programmes in Environmental Sciences, Climate Change, Applied Ecology, and Environmental Assessment and Management (full-time and part-time). BSc programmes include Environmental Sciences, Geography (both BA and BSc), Geology with Geography and Geophysics (all also offered with a year in several other countries, or with a year in industry).

Patron: King Charles III

Head of School: Professor Ian Renfrew

ABOUT THE FACULTY

The Faculty of Science is home to a vibrant community of students, staff, and visitors. Our lively environment allows high quality, innovative research across a broad spectrum of themes. This vibrant culture provides a base for our research-led teaching and underpins all our activities from influence of government policy to presentations at local schools.

Our five Schools of Study engage in world leading research. You can find out more about the courses taught and activities taking place in our Schools on our Faculty information pages.

- School of Biological Sciences
- School of Computing Sciences
- School of Chemistry, Pharmacy and Pharmacology
- School of Engineering, Mathematics and Physics
- School of Environmental Sciences

Our Schools are bolstered by degree courses in Actuarial Science, Natural Sciences, Physics and Geography.

“The UEA ‘Do Different’ ethos is central to Science and Engineering at UEA, which provides a dynamic and inclusive environment for teaching, research, innovation, and application. We are open to new faculty members who can complement and extend our interdisciplinary portfolio.”

OUR VALUES

Shaped by staff, our UEA values represent a core set of standards for how we behave as an employer, drive excellence in teaching, learning and research, and collaborate as an anchor institution in our local community.

From tackling global challenges, striving for student and staff success, and creating a vibrant inclusive environment, our values are what unite us.

- ✦ AMBITION
- ✦ COLLABORATION
- ✦ EMPOWERMENT
- ✦ RESPECT

OUR VALUES (CONTINUED)

AMBITION

We are ambitious for our future success.

We are forward-thinking and brave in our approach and decisions. We make space for innovation and creativity, seizing opportunities that are responsible and sustainable. We are ambitious for the advancement of education and research.

COLLABORATION

We are collaborative in our approach.

We work together with shared purpose. We build connections, share ideas and develop new networks. We champion our regional, national and global relationships and demonstrate that together we can achieve greater goals and positively influence the world around us.

EMPOWERMENT

We empower ourselves and each other.

We develop ourselves and others, trusting people to make decisions based on their expertise and knowledge. We continually improve systems and processes to support us in working in an agile and efficient way.

RESPECT

We respect each other.

We treat everyone with respect and dignity. We value diversity and foster a community where people can express different thoughts and views. We are open to challenge, so we can learn and improve. We encourage a positive, inclusive environment where everyone has opportunities to fulfil their potential.

RESEARCH AT UEA

REF21 results showed that 91% of our research is world leading or internationally excellent ([The University of East Anglia : Results and submissions : REF 2021](#)); and the Knowledge Exchange Framework (KEF) results show UEA as above average across most indicators in our Cluster-X grouping ([Knowledge exchange framework: Dashboard \(kef.ac.uk\)](#)).

UEA research is highly cited, the 6th most cited in the UK and 41st globally (THE Research Citations rankings 2022). Ten researchers associated with the Norwich Research park and seven researchers from UEA have been named in the annual [Clarivate Web of Science Group Highly Cited Researchers list for 2022](#).

UEA is listed in the World Top 100 for research citations (Times Higher Education World University Rankings 2023) and World Top 50 (Times Higher Education Impact Rankings 2022).

REF21 Highlights – Top 20s

- 1st overall, 6th for outputs and 1st for impact - for (Anthropology and) Development Studies (8th for research power)
- 1st overall, 2nd for outputs and 1st for impact - for Agriculture, Food and Veterinary Sciences
- 3rd overall, 7th for outputs and 8th for impact – for History
- 4th overall, 14th for outputs and 5th for impact -

for Earth Systems and Environmental Sciences (9th for research power)

- 4th overall, 9th for outputs and 1st for impact - for Social Work and Social Policy
- 5th overall, 8th for outputs and 7th for impact - for Area Studies

UEA is home to several world-renowned Research Centres and Networks

- Climatic Research Unit (CRU) [Climatic Research Unit - Groups and Centres \(uea.ac.uk\)](#)

- Productivity East <https://www.uea.ac.uk/groups-and-centres/productivity-east>

UEA houses the British Archive for Contemporary Writing (with material from renowned authors such as Doris Lessing and Lee Child), the nationally accredited East Anglian Film Archive, Sainsbury Centre for Visual Arts, Sainsbury Institute for the Study of Japanese Arts and Culture, and Sainsbury Research Unit for the Arts of Africa, Oceania and the Americas.

OTHER ACCOLADES

- Queen's Anniversary Prizes for Higher and Further Education have been awarded to UEA for international development studies (2009), creative writing (2011) and environmental sciences (2017). Notable alumni include Sir Paul Nurse (1973, Nobel Prize for Medicine 2001), Sir Kazuo Ishiguro (1980, Nobel Prize for Literature 2017), Sir Michael Houghton (1972, Nobel Prize for Medicine 2020) and Sarah Gilbert (1983) who led the Oxford University team to develop a COVID-19 vaccine, approved in 2020.
- Our Doctoral College, established in 2018, hosts six Doctoral Training Partnerships and integrates Faculty and School provision for 1600 Postgraduate Research Students (including those from across the Norwich Research Park), enabling collaboration and innovation.
- We recognise our global impact and were one of the first universities to declare a climate and biodiversity emergency in June 2019. Our sustainable campus, including over 50 acres of environmentally valuable parkland, is constantly evolving with ambitions to be 100% net zero by 2045 or sooner.
- UEA is a University of Sanctuary, an accreditation given to universities that show an ongoing commitment to creating a welcoming culture of inclusivity and awareness.
- UEA was awarded the Silver Athena SWAN Award in 2019, and all our Schools hold awards at Bronze or Silver.

A vibrant place to study, learn and work, UEA is a very special place.

A SUSTAINABLE UNIVERSITY

At UEA, we are now working to create a university that will be even better in the future, and we are working to achieve net zero carbon by 2045 (or earlier). Our Sustainable Ways vision is one of a resilient university – where consumption is efficient and self-generated energy supports low carbon goals, supported by a vibrant community of world-leading researchers and inspired graduates.

At a basic level, our sustainable development means that we try to balance the 'three pillars' of environmental, economic and social elements.

We challenge our environmental impact through on-site energy generation and a district heating and cooling network, reducing our reliance on grid electricity and therefore fossil fuels. We promote and use recycled and 'eco' products such as biological cleaning materials. We champion local suppliers and ethical causes, including Fairtrade and vegan products. We seek to ensure value for money in a holistic, whole-life costing sense in our new buildings and procurement contracts.

OUR INITIATIVES

Central campaigns, such as holiday shut-downs or awareness day events, support a whole-University approach to energy saving and other initiatives.

Follow us on X [@SustainableUEA](https://twitter.com/SustainableUEA)

OUR CAMPUS

UEA is based on a campus that provides top quality academic, social and cultural facilities to over 17,000 students.

Although located in 320 acres of rolling parkland, virtually no part of the campus is more than a few minutes' walk from anywhere else, so everything is close at hand – the library, nursery, health centre, supermarket (incorporating a post office) and restaurants. Amongst the striking buildings is the UEA's Sainsbury Centre for Visual Arts, which contains the Robert and Lisa Sainsbury Collection – one of the greatest art collections formed in Europe during the 20th Century.

The University has invested in new learning and teaching and research spaces, including a celebrated new Enterprise Centre that underpins its commitment to promoting student enterprise and entrepreneurship.

Sport and Recreation plays a major part in the life of the University of East Anglia, centred around the major Sportspark facility which is one of the most successful community sport facilities in the UK. This accessible and affordable facility provides a diverse range of activities, and incorporates a 50m Olympic size swimming pool, indoor climbing wall, coaching resource centre and sports injury clinic.

NORWICH

A CITY OF STORIES

The city's motto is 'A fine city' and its strong cultural heritage has seen Norwich maintain the best of its historical character whilst developing to become one of the most vibrant and attractive cities in Europe. Norwich offers miles of riverside walks and cycle ways, and a unique collection of 1930s parks. The city is surrounded by beautiful countryside and within easy reach of the stunning Norfolk coast.

Norwich is a UNESCO World city of Literature, the first in the UK, as well as being one of the newly named Tech Cities recognising the growth of digital businesses in the region. The most prominent high-rise building, apart from the castle, is the magnificent 11th century cathedral, which still dominates the skyline. The city's medieval centre of cobbled streets remains largely intact, but there is still space for modern buildings such as the city's centrepiece, the Forum, which is a striking piece of contemporary architecture. The glass front overlooks the colourful open-air market (one of the largest in the country) and reflects the city in all its diversity.

The city is consistently rated as one of the top ten shopping venues in the UK. Norfolk and Suffolk attract thousands of visitors each summer. The famous Norfolk Broads are among the most important wetlands in Europe and a haven for rare plants, wildlife and insects. The Broads attract holidaymakers who come to navigate the intricate natural network of waterways formed by the Rivers Bure, Yare and Waveney and their tributaries.

For further information about UEA's excellent facilities, staff benefits, picturesque campus and the UEA working environment, please visit the 'Careers at UEA' microsite <https://www.uea.ac.uk/about/working-at-uea>. Additional information about living and working in the city of Norwich can be found at <https://www.workinnorwich.co.uk/>

If there is another city in the United Kingdom with a school of painters named after it, a matchless modern art gallery, a university with a reputation for literary excellence which can boast Booker Prize-winning alumni, one of the grandest Romanesque cathedrals in the world, an extraordinary new state-of-the-art public library then I have yet to hear of it. Norwich is a fine city. None finer.

STEPHEN FRY

LOCATION

Some cities you've heard of, others you have to discover. Norwich is one of the most beautiful, modern historic cities in Britain. It's a city that celebrates the independent, stimulates creativity, promotes change and encourages diversity.

UEA is a campus university located 3 miles from the centre of Norwich. Situated in the heart of Norfolk, which means it's an ideal location to explore Norwich and beyond.
